01/ Using the CTF Matching Screen

Introduction	1
Importing a Common Transfer File (CTF).....	1
Importing the CTF.....	12

Introduction

The **Match and Import** panel on the **Import CTF** page enables you to examine the data stored in SIMS against the information in the CTF and decide which information should be imported.

IMPORTANT NOTES: The matching method used in previous versions of SIMS has not changed, neither have the data items contained in the CTF file.

The functionality provided by the **Match and Import** panel on the **Import CTF** page is entirely optional. If you do not wish to use this enhanced functionality, you can continue to import a CTF using the original method.

When using the **Match and Import** panel on the **Import CTF** page, you are strongly advised to use a screen resolution of 1280x1024.

In order to use the **Match and Import** panel, you must have Microsoft .NET Framework 4.0 installed. This can be downloaded from the Microsoft® website (<http://www.microsoft.com>).

Importing a Common Transfer File (CTF)

The CTF Matching routine enables you to define how a record in a CTF is imported into SIMS. It also enables you to select a record in the CTF that matches a record in your SIMS database then update the SIMS database with any missing details.

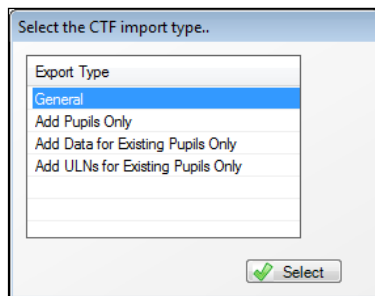

The method used to match a record in the CTF with a record in the SIMS database can be changed, enabling you to be as strict or as flexible as necessary.

The Core data (UPN, Surname, Forename, Gender and Date of Birth) is mandatory and is always imported.

IMPORTANT NOTES: You are strongly advised to run the Address Tidy and Merge routine before importing or exporting a CTF to reduce the number of potential issues with regard to address matching.

Any pupil/students records where the reason for leaving is recorded as **Deceased** are not imported.

1. Select **Routines | Data In | CTF | Import CTF** to display the **Select the CTF import type** dialog.

This dialog enables you to create the following types of CTF:

- **General** - imports a full CTF export file.
 - **Add Pupils Only** - imports data for pupil/students who do not already exist in SIMS.
 - **Add Data for Existing Pupils Only** - imports data in the CTF for pupil/students who already exist in SIMS.
 - **Add ULNs for Existing Pupils Only** - imports only the ULNs for pupil/students who already exist in SIMS.
2. Highlight the required CTF import type then click the **Select** button to display a message asking you to confirm whether you wish to change the matching scale.

This message relates to the **Match and Import** panel on the **Import CTF** page, which enables you to examine the data stored in SIMS against the information in the CTF and decide which information should be imported.

The scale defaults to level **2**, indicating that the system will match on similar surname and forename.

3. If you wish to remain on level **2** of the matching scale, click the **No** button to display the **Import CTF** page then import the CTF. The page name is appended with the option selected in the previous dialog. To change the matching scale, click the **Yes** button to display the **CTF Matching Scale** dialog.

CTF Matching Screen: Scale 2.			
Match Surname and Forename	Match Similar Surname, Forename	Match Similar Surname and Similar Forename Separately	Match first character of Surname and Forename
1	2	3	4

CTF Matching Screen Scale 2: Selecting scale 2 will set the CTF Matching Screen to include:

1. Exact match on Surname, Forename and where middle name in SIMS is included in Forename of CTF record
e.g. Forename: Sally-Anne in CTF and Forename: Sally Middle Name: Anne in SIMS
And
2. Potential match on (Surname, Forename) will include similar Surname and Forename together
e.g. Ben Abbot and Benjamin Abott

Please note that Date of Birth and Gender will always be mandatory in the CTF and match the SIMS record to be a match.

Set Scale

This screen enables you to select the required scale from the following:

- Scale **1** – Match Surname and Forename
- Scale **2** – Match Similar Surname and Similar Forename
- Scale **3** – Match Similar Surname and Similar Forename Separately
- Scale **4** – Match first character of Surname and first character of Forename

The corresponding number indicates the level of matching you wish to carry out, with level 1 being the most strict and 4 being the most flexible.

4. Select the required matching scale by clicking the required heading (e.g. **Match Surname and Forename**) or the required level number (e.g. **1**).
- Clicking the required matching scale displays in the bottom panel of the screen, more detailed information on the selected scale.
5. Confirm that you wish to implement the new matching scale by clicking the **Set Scale** button to display the **Import CTF** page.

NOTE: The matching scale can be changed later in the process via the **Match and Import** panel on the **Import CTF** page.

Selecting the CTF Import File

The categories of data that can be imported via CTF are displayed in the **Data to be Imported** panel. Any data item where the adjacent check box is selected indicates an item that will be imported by default.

*NOTE: The data items that will be imported by default are defined on the **Configure CTF Defaults** page (via **Tools | Setups | CTF**).*

The screenshot shows the 'Import CTF' interface. At the top, there are three tabs: '1 Data to be Imported', '2 Import Selection', and '3 Exception Log'. The '1 Data to be Imported' tab is active, showing a grid of data categories with checkboxes. All checkboxes are checked. Below this, the '2 Import Selection' tab is active, showing a 'CTF File' input field, a 'Place new pupils in' dropdown menu set to 'Pre-Admission', and a table of pre-admission groups. A 'Proceed For Match Import' button is at the bottom right.

Pre-Admission Group	Admit On	Year Group
CCS Intake 2010/2011 (A)	01/05/2011	Year 7

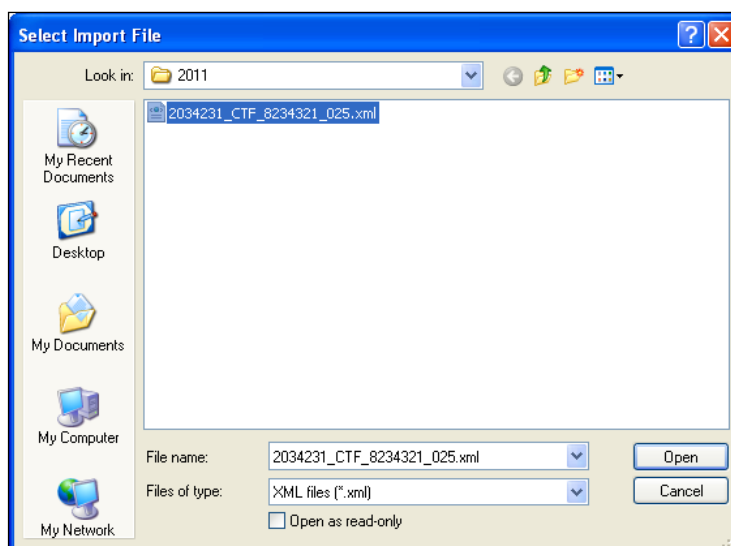

Amend the default settings by selecting or deselecting the appropriate check box(es), if required.

TIP: Hover the mouse over each check box to view a list of the data in each section, as shown in the following graphic.

This close-up shows the '1 Data to be Imported' panel. A tooltip is displayed over the 'Student Basic Details' checkbox, listing the data items included in that category. The other categories and their checkboxes are also visible.

Category	Check Box	Data Items (from tooltip)
Student Basic Details	<input checked="" type="checkbox"/>	Former UPN, Preferred Surname, Former Surname, Preferred Forename, Middle Names, National Curriculum Year, Ethnicity, Ethnicity Source, Languages Information (Language qualifier and Languages), Free School Meal Eligibility, Free School Meal Review Date, Medical Flag
Student Address	<input checked="" type="checkbox"/>	
Student Contacts	<input checked="" type="checkbox"/>	
SEN Information	<input checked="" type="checkbox"/>	
School History	<input checked="" type="checkbox"/>	
Attendance Summary	<input checked="" type="checkbox"/>	
FSM History	<input checked="" type="checkbox"/>	

1. Select the CTF File you wish to import by clicking the **File Browser** button in the **Import Selection** panel to display the **Select Import File** dialog.

2. Navigate to and highlight the required CTF file then click the **Open** button to return to the **Import CTF** page.

NOTE: Before the import takes place, SIMS checks that the CTF file you have selected is intended for your school by validating the header information contained in the file and the CTF file name. The header information contains the Local Authority number and Establishment Code for your school. If the file you are trying to import is not intended for your school, a warning message is displayed and the import should be abandoned. If the CTF file field appears red, the file is likely to be invalid. The file name should contain the Local Authority number/school number of the sending school and the Local Authority number/school number of the receiving school.

3. Select whether you wish to place the pupil/students contained in the CTF file into a **Pre-Admission** group or **On-Roll** from the **Place new pupils in** drop-down list.

If you wish to place them in a **Pre-Admission** group, highlight the required group in the table.

If you wish to place them **On-Roll**, select an **Effective Date** (i.e. place them on-roll as of this date) by clicking the **Calendar** button then selecting the required date.

You might wish to enter an earlier date if, for example, the CTF is received after the pupil/student has been admitted to the school. If the CTF is imported after the pupil/student has been admitted, their group memberships will commence as of the current date. Selecting an earlier date, i.e. when the pupil/student arrived at the school, enables the group memberships to be set accurately and without the need for manual intervention.

If you leave the date as the default, CTF import creates membership information (e.g. ethnic, religion, etc.) for an on-roll pupil/student as of the day of import, meaning you must change these membership dates manually to make them accurate, if required.

4. With the correct options selected, click the **Proceed For Match Import** button to display the **Match and Import** panel.

3 Match and Import

This Match and Import screen is used to match pupils in the CTF import file and SIMS. The CTF file can be imported at any point of the matching process. When the CTF is being imported, the matches identified in the 'Selected Pupil' column will be applied. When you are ready to import the CTF file, click the 'Import CTF' button at the bottom of the page.

Pre CTF Import Report Import CTF

Matching Pupil/Students and Importing the CTF File

The CTF Matching routine enables you to define how a record in a CTF is imported into SIMS. It also enables you to select a record in the CTF that matches a record in your SIMS database then update the SIMS database with any missing details.

The method used to match a record in the CTF with a record in the SIMS database can be changed, enabling you to be as strict or as flexible as necessary.

IMPORTANT NOTE: The functionality provided by the **Match and Import** panel is entirely optional. If you do not wish to use this enhanced functionality, you can continue to import a CTF using the original method by clicking the **Import CTF** button in the **Match and Import** panel without making any changes in this panel.

The **CTF Pupil** column displays pupil/students who are either pre-admission or on roll.

Pre-Admission Pupil/Student icon

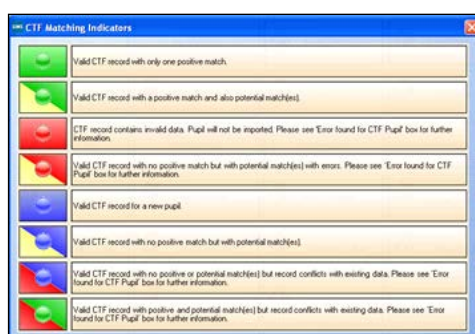

On Roll Pupil/Student icon

CTF Matching Indicators

The **Match and Import** panel displays indicators that help you to identify whether the CTF record has any conflicts and shows how the pupil/student record will be imported into SIMS.

Click the **Indicator** link to display the **CTF Matching Indicators** dialog, which shows a detailed description of each indicator.

Exit the **CTF Matching Indicators** dialog to return to the **Match and Import** panel.

CTF Matching Scale

The **Match from following** panel includes a link that can be selected to show the **CTF Matching Scale (View CTF Matching Scale For Potential Matches)**.

*NOTE: The **CTF Matching Scale** is read-only. Any changes will need to be made by re-opening the **Import CTF** page by selecting **Routines | Data In | CTF | Import CTF**.*

Two grids are displayed in the **Match from following** panel.

- **Positive Match** – the record the CTF would match upon import if no action is taken.
- **Potential Matches** – could display more than one potential match from either the pre-admission or on-roll records.

The cell you select in the **Match and Import** panel will determine what is displayed in the **Match from following** section on the right-hand side of the panel.

- If you select a cell in the **CTF Pupil** column, all potential matches (whether on-roll or pre-admissions) will be displayed in the **Match from following** section on the right-hand side of the panel.
- If you select a cell in the **Pre-Admission Pupil** column then only pre-admission potential matches will be displayed.

- If you select a cell in the **Admitted Pupil** column then only the admitted potential matches will be displayed.
- If you select a cell in the **Selected Pupil** column then on-roll and pre-admission pupils will be displayed.

The users can agree with the system that the positive match is correct and leave as the **Selected Pupil** or they can double click on a potential match and then that match will become the **Selected Pupil** which is the CTF record that will be updated.

Additional Functionality

If you decide that the **Selected Pupil** and/or potential student/pupil(s) are incorrect matches, then right-click the **Selected Pupil** and select **Remove selection** to change the selection to a **New Pupil** or a **Conflicting Pupil**.

If you right-click the **CTF Pupil** column and select **Add as a new pupil**, the content of the **Selected Pupil** column changes from **Positive Match** or **Manual Match** to **New Pupil**.

If you right-click the **CTF Pupil** column and select **Do not import this pupil**, the selected pupil will not be imported.

The number under the symbol reflects the number of matches found. The first name in the grid is displayed in the pupil cell but all matches are displayed in the **Match from following** grid.

Refreshing

Clicking the **Refresh** button when data in SIMS has been changed affects the pupil/students in the Match and Import panel.

Refresh button

The following is an example of a change you may wish to make in the **Match and Import** panel.

Indicator	CTF Pupil	Pre-Admission Pupil	Admitted Pupil	Selected Pupil
	Christopher_Cillian	christopher_cillian [1]	Christopher_Cillian [1]	Christopher_Cillian

Christopher Cillian has a UPN in CTF that matches the pre-admission pupil record in SIMS. However, you may wish to make the admitted pupil in SIMS match to the CTF record so that upon import all the information apart from the UPN will be imported to the admitted pupil.

You can delete the pre-admission record which will delete the UPN and allow it to be assigned to the admitted pupil.

1. Click the **Pre-Admission Pupil** cell to display the data for that pupil/student as shown in following graphic.

CTF Pupil Details		Pre-admission Pupil Details	
Names	Details	Names	Details
UPN	V743975593745	UPN	V743975593745
Former UPN		Former UPN	
Surname	Cillian	Surname	cillian
Forename	Christopher	Forename	christopher
DOB	02/06/1998	DOB	02/06/1998
Gender	M	Gender	M
		Mismatch	

The graphic shows that UPNs match and the pre-admission UPN needs to be removed.

2. Right-click the **Edit Pupil** link on the right-hand side of the page then select **Go to Browser** to display the **Find Application** browser.
3. Search for and highlight the required pupil/student (Christopher Cillian in this example) then click the **Delete** button in the browser to delete the record.
4. Once the record has been deleted, click the **Back** button to return to the **Match and Import** panel and click the **Refresh** button to remove Christopher Cillian from the **Pre-Admission Pupil** column and allow the UPN to be imported against the admitted record upon import of the CTF.

There are two panels at the bottom of the **Import and Match** panel. The first panel contains information about the CTF pupil/student that is taken from the CTF file. These include:

- UPN
- Former UPN
- Surname
- Forename
- DOB
- Gender.

When you select a different pupil/student, the **CTF Pupil Details** panel changes.

The details in the second panel will differ depending on what cells you select.

If the pupil/student selected does not have any conflicting errors with SIMS, the following graphic is displayed.

CTF Pupil Details		Names	
Details		Details	
UPN	1425932540000		No data found.
Former UPN	034576847075		
Surname	Joah		
Forename	Joah		
DOB	07/10/2007		
Gender	M		

If the pupil/student selected has conflicting errors with SIMS then the **Error found for CTF Pupil** panel will be displayed.

CTF Pupil Details		Error found for CTF Pupil	
Details		Names	Details
UPN	002042100007	Abbott, James	Student not imported as UPN(002042100007) already exists for Abbott, Jam.
Former UPN	039000490000		
Surname	James		
Forename	James		
DOB	05/10/2007		
Gender	M		

01/ Using the CTF Matching Screen

If the pupil/student selected in the **Selected Pupil** column is admitted or has ever been admitted, the **Matched On-Roll Pupil Details** will be displayed.

CTF Pupil Details	Matched On-Roll Pupil Details
Details UPN: A89596409885 Former UPN: C29596409885 Surname: Smith Forename: John DOB: 07/10/2007 Gender: M	Details UPN: A89596409885 Former UPN: C29596409885 Surname: Smith Forename: John DOB: 07/10/2007 Gender: M

If you select a pupil/student in the **Selected Pupil** column and they are a pre-admission pupil then the **Matched Pre-admission Pupil Details** will be displayed.

Running the Pre CTF Import Report

The Pre CTF Import Report can be run to indicate what exactly will happen if you decide to import the CTF.

Pre CTF Import Report

This report is designed to show the results should user decide to import the CTF.
Once the user is satisfied with the report the 'Import CTF' button can be selected.

Security Message: This report contains sensitive information.
