

Dear School

As you may be aware from previous communications, RM SecureNet will be withdrawn from service on the **8th September 2017**. The system is used by Devon County Council and Schools to exchange finance, payroll and education securely on a regular basis.

Devon County Council have been working with RM to provide a suitable replacement and the AnyComms+ system delivered by AVCO Systems in partnership with by RM Education has been adopted.

The new service provides greater compatibility with modern browser systems, a refined interface and is hosted in a secure datacentre used by the likes of Experian and other Local Authorities.

What do you need to do?

The system will be live from the **29th August 2017** and you will receive your login credentials at school level on this date.

Please Note: You will only have access until the **10th September 2017** at which point access will be revoked if you have not completed an order form for this software for each School you are ordering for. (Order form attached to this email). Any tasks due prior to the 10th September should be undertaken on RM Securenet

There are 2 contract options listed below and these need to be purchased at a licence per school no later than the **10th September 2017**. All orders need to be placed directly with RM by emailing orderprocessingbox@rm.com
