

Scomis Desktop

for effective use of
SIMS

Do you want to be able to provide your teachers with the features and tools they actually need to complete teacher-focused administrative functions?

Do you want to be able to provide your teachers with a solution that can be accessed securely, anytime, anywhere and from any device?

In partnership with data and communication specialist, Groupcall, Scomis is delighted to introduce schools to 'The Scomis Desktop'.

Powered by Groupcall, The Scomis Desktop provides all the administrative functions classroom teachers need on a day-to-day basis. Full integration with a school's Capita SIMS database provides teachers with access to SIMS data, with write back to the school's Capita SIMS when changes are made.

What is The Scomis Desktop?

The Scomis Desktop boasts a fresh, intuitive interface which provides the tools schools need whilst streamlining features to help save time. Teachers can easily perform core tasks such as student achievement, behaviour, assigning detentions and taking registers. The product also includes easy to use seating plans where layouts can be customised for individual lessons. Staff can also view timetables and reports and spot data trends relating to attendance, achievement and behaviour to help improve student outcomes.

The Scomis Desktop is a secure cloud solution accessible anywhere, anytime on any modern browser and any tablet-sized device or PC, which also makes it the ideal solution for teachers to use if they choose to work from home to complete reports, assessments and marksheet.

In addition, a school's other third-party applications (such as homework or library systems) can integrate into the Scomis Desktop eco-system to take advantage of single sign-on.

At the heart of everything
we do is joined up thinking.

The benefits of The Scomis Desktop:

- Removes the barriers to using SIMS effectively in the classroom
- Provides all the information teachers require without accessing SIMS
- Encourages teachers to view and interact with their SIMS database anytime, anywhere and across a variety of devices
- Single sign-on to SIMS and other 3rd Party applications
- Intuitive interface
- Fully integrates with the Scomis SIMS Hosted Application Service

The ideal solution for teachers working in school

Teacher Home Screen

Accessing the timetable information from SIMS, the home screen displays the classes ready for registration with the magnifying glass to the right to allow search for student, class or year group.

Access to Student Records

Attendance/ Conduct Dashboard

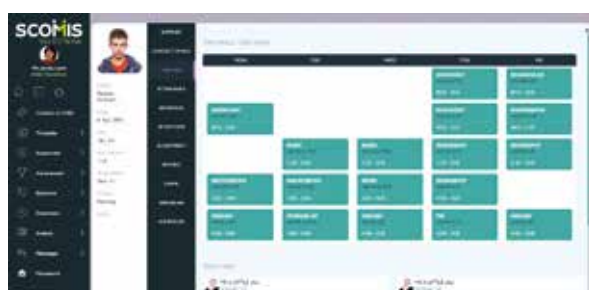

A teacher can open a student record to see their overall attendance, conduct points for the week/year, current lesson and next lesson.

Contact details

Contact details for the student including siblings in the school.

Data is available for emergency situations or school trips.

Timetable

Timetable for the student including a list of associated teaching staff that have contact with the student

About Scomis

The Scomis Group is a specialist provider of ICT solutions and services to organisations within the education and local government sectors. Our aim is to ensure that our customers achieve effective and efficient use of ICT that delivers best value and improved outcomes. We currently work with more than 720 schools, academies and Multi Academy Trusts across 23 local authorities from Cornwall in the south west up to Redcar and Cleveland in the north east. For more than 30 years we have operated as a not-for-profit, wholly traded service that is part of Devon County Council. With no shareholders, any small surpluses are reinvested in ongoing service improvements and to the benefit of the public sector.
