SIMS ID

A single login for access to multiple applications

A safe and secure, single sign-on solution from desktop to cloud

Easy-to-manage access for staff and pupils

Reduces administration time

Enables Google and Office365 integration

Who benefits?

Senior Leaders

IT Managers

Teachers and pupils

SIMS

A single sign-on solution for your school

SIMS ID makes running cloud services effortless by providing teachers, staff and pupils with a single login for multiple local and cloud based applications.

Ensure your cloud services are secure

The ability to manage user permissions centrally offers reassurance that access to your school's systems is secure. Individual user security is ensured by enabling self-service password management, saving valuable time for technical staff. Teachers, staff and pupils benefit from having only one password to remember and enjoy simple access to services through a user-friendly Launchpad.

Key benefits of SIMS ID

For staff and pupils:

- ✓ Only need to remember a single username and password for all your services connected to SIMS ID
- ✓ Ability for users to securely reset and manage their own passwords
- ✓ No need to re-enter passwords once you've logged into your network device
- ✓ Customisable Launchpad providing simplified, consistent access to your online services from any device
- ✓ Your SIMS timetable visible in your Google and Office365 calendar.

For IT managers:

- ✓ Simple management of user identities across local and online services via a single admin portal
- ✓ Automatically pulls your data from SIMS to create your SIMS IDs in your chosen format
- ✓ Automatically provisions users and groups into integrated cloud services including Office365 or Google
- ✓ Minimises the effort of running your local Active Directory through automatic updates to your local users and groups
- ✓ Enforces centrally administered security policies, including disabling all services when a user leaves your service
- ✓ Provides clear audit trails to assist you in maintaining the security of your systems and data.

For senior leaders:

- ✓ Reassurance that the right people have the right level of access to the right systems
- ✓ Confidence that when a user leaves and is deactivated in, or removed from, SIMS, all services managed by SIMS ID are automatically disabled and access to school data is revoked
- ✓ Free up your technical resources from repetitive admin tasks, like password resets and end of year changeover.

How it works

Your SIMS database

Access local networks and local SIMS
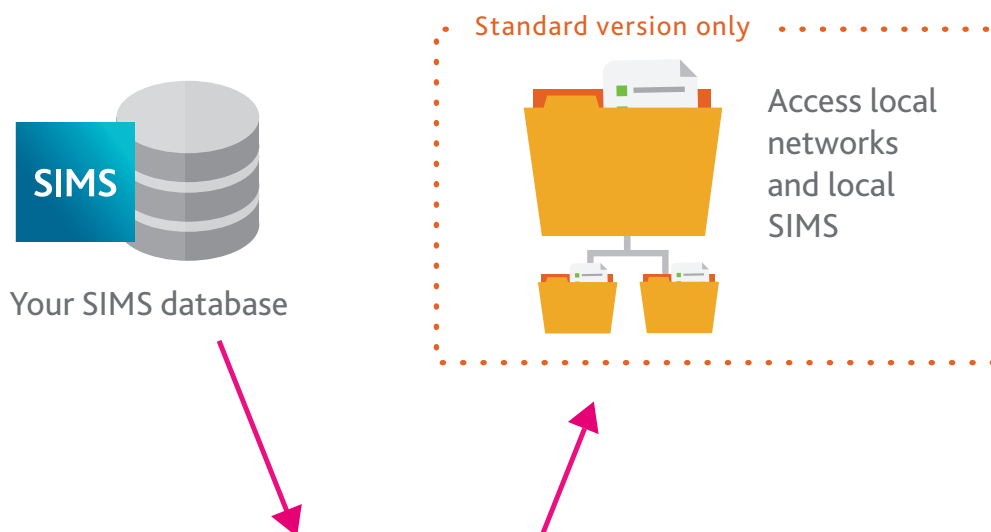

# SIMS ID

generate school email addresses

manage user accounts

Integrates with:

- ☑ Cloud services
- ☑ Office 365
- ☑ Google
- ☑ Hosted SIMS
- ☑ MyAccount
- ☑ SIMS calendar and timetable synchronication

Users have easy access to their assigned cloud services through a user-friendly launch pad.

SIMS ID LIGHT

If you're only looking to simplify access to your cloud services, then SIMS ID Light is for you. This service enables SIMS ID for your cloud services only, whilst still including seamless integration with SIMS.

- ✚ Launchpad
- ✚ O365 and/or Google integration
- ✚ Automated MIS to SIMS ID provisioning
- ✚ Single sign-on to cloud services
- ✚ Synchronises with SIMS calendar and timetables

SIMS ID STANDARD

Includes all of the above, plus:

- ✚ Local Active Directory account provisioning
- ✚ Single sign-on from desktop to cloud services
- ✚ Local network and local SIMS access

Your questions answered

Is SIMS ID hosted or installed?

SIMS ID is a hosted and fully managed solution. The advantage of this for schools, multi-academy trusts and local authorities is that it reduces the costs of managing and delivering a completely integrated ICT solution.

Is SIMS ID secure?

Yes, it contains a number of security features which allow you to grant appropriate access to relevant members of the organisation, ensuring only authorised personnel are able to make changes to a user or group.

Can I integrate with local resources and applications?

Yes. SIMS ID can be used to generate logins for any locally based services that work with Active Directory.

Can our school still use SIMS ID if we run SIMS locally?

Yes, you will still be able to use SIMS ID if you run SIMS locally, but you can only use single sign-on to access SIMS and FMS if you have the versions of those products that are hosted by us.
